### 11.2.1. Sessional Exams

Two sessional exams shall be conducted for each theory / practical course as per the schedule fixed by the college(s). The scheme of question paper for theory and practical sessional examinations is given in the table. The average marks of two sessional exams shall be computed for internal assessment as per the requirements given in tables.

## 12. Promotion and award of grades

A student shall be declared PASS and eligible for getting grade in a course of M.Pharm programme if he/she secures at least 50% marks in that particular course including internal assessment.

## 13. Carry forward of marks

In case a student fails to secure the minimum 50% in any Theory or Practical course as specified in 12, then he/she shall reappear for the end semester examination of that course. However, his/her marks of the Internal Assessment shall be carried over and he/she shall be entitled for grade obtained by him/her on passing.

## 14. Improvement of internal assessment

A student shall have the opportunity to improve his/her performance only once in the sessional exam component of the internal assessment. The re-conduct of the sessional exam shall be completed before the commencement of next end semester theory examinations.

## 15. Reexamination of end semester examinations

Reexamination of end semester examination shall be conducted as per the schedule given in table 29. The exact dates of examinations shall be notified from time to time.

Table – 29: Tentative schedule of end semester examinations

Semester	For Regular Candidates	For Failed Candidates
I and III	November / December	May / June
II and IV	May / June	November / December

## 16. Allowed to keep terms (ATKT):

No student shall be admitted to any examination unless he/she fulfills the norms given in 6. ATKT rules are applicable as follows:

A student shall be eligible to carry forward all the courses of I and II semesters till the III semester examinations. However, he/she shall not be eligible to attend the courses of IV semester until all the courses of I, II and III semesters are successfully completed.

A student shall be eligible to get his/her CGPA upon successful completion of the courses of I to IV semesters within the stipulated time period as per the norms:

Note: Grade AB should be considered as failed and treated as one head for deciding ATKT. Such rules are also applicable for those students who fail to register for examination(s) of any course in any semester.

## 17. Grading of performances

### 17.1. Letter grades and grade points allocations:

Based on the performances, each student shall be awarded a final letter grade at the end of the semester for each course. The letter grades and their corresponding grade points are given in Table – 30.

Principal

**Table – 30: Letter grades and grade points equivalent to  
Percentage of marks and performances**

Percentage of Marks Obtained	Letter Grade	Grade Point	Performance
90.00 – 100	O	10	Outstanding
80.00 – 89.99	A	9	Excellent
70.00 – 79.99	B	8	Good
60.00 – 69.99	C	7	Fair
50.00 – 59.99	D	6	Average
Less than 50	F	0	Fail
Absent	AB	0	Fail

A learner who remains absent for any end semester examination shall be assigned a letter grade of AB and a corresponding grade point of zero. He/she should reappear for the said evaluation/examination in due course.

### 18. The Semester grade point average (SGPA)

The performance of a student in a semester is indicated by a number called 'Semester Grade Point Average' (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses by the student during the semester. For example, if a student takes five courses (Theory/Practical) in a semester with credits C<sub>1</sub>, C<sub>2</sub>, C<sub>3</sub> and C<sub>4</sub> and the student's grade points in these courses are G<sub>1</sub>, G<sub>2</sub>, G<sub>3</sub> and G<sub>4</sub>, respectively, and then student's SGPA is equal to:

$$\text{SGPA} = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4G_4}{C_1 + C_2 + C_3 + C_4}$$

The SGPA is calculated to two decimal points. It should be noted that, the SGPA for any semester shall take into consideration the F and ABS grade awarded in that semester. For example if a learner has a F or ABS grade in course 4, the SGPA shall then be computed as:

$$\text{SGPA} = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4 \cdot \text{ZERO}}{C_1 + C_2 + C_3 + C_4}$$

### 19. Cumulative Grade Point Average (CGPA)

The CGPA is calculated with the SGPA of all the IV semesters to two decimal points and is indicated in final grade report card/final transcript showing the grades of all IV semesters and their courses. The CGPA shall reflect the failed status in case of F grade(s), till the course(s) is/are passed. When the course(s) is/are passed by obtaining a pass grade on subsequent examination(s) the CGPA

Assignment no. 1  
 Name: Ugale Prathamesh Anvashah  
 class: 17 pharma D. Roll no: 28

\* Aldol condensation:

When two molecules of acetaldehyde react with each other in the presence of sodium hydroxide (10%) then it gives 3-hydroxy butanal (aldol product).

Mechanism:

Step I: Separation of sodium hydroxide. It gives sodium containing positive charge and hydroxy group containing negative charge (nucleophile).

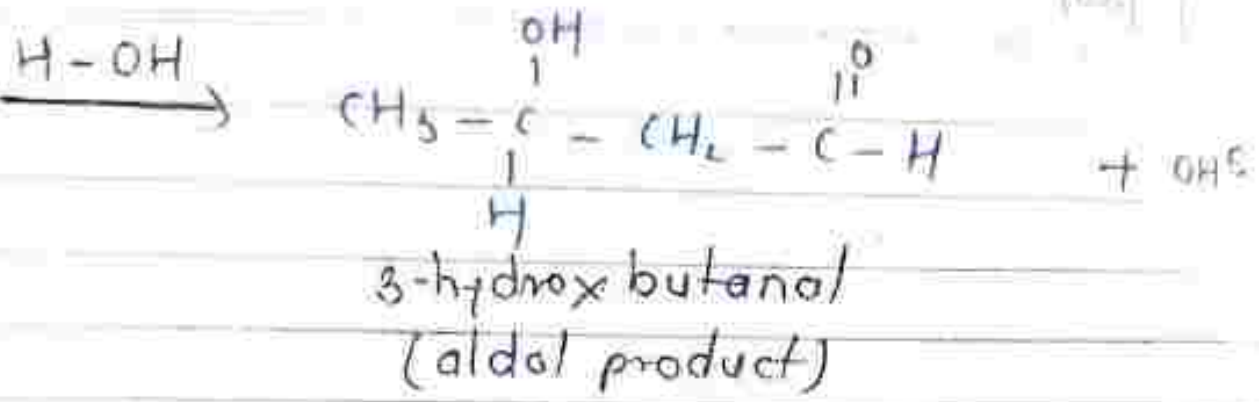

Step II: Nucleophile react with first molecule of acetaldehyde to give carbanion.

Step III: Carbanion react with second molecule of acetaldehyde to give 3-hydroxy butanal (aldol product).

★ Wolf-Kishner Reaction:-

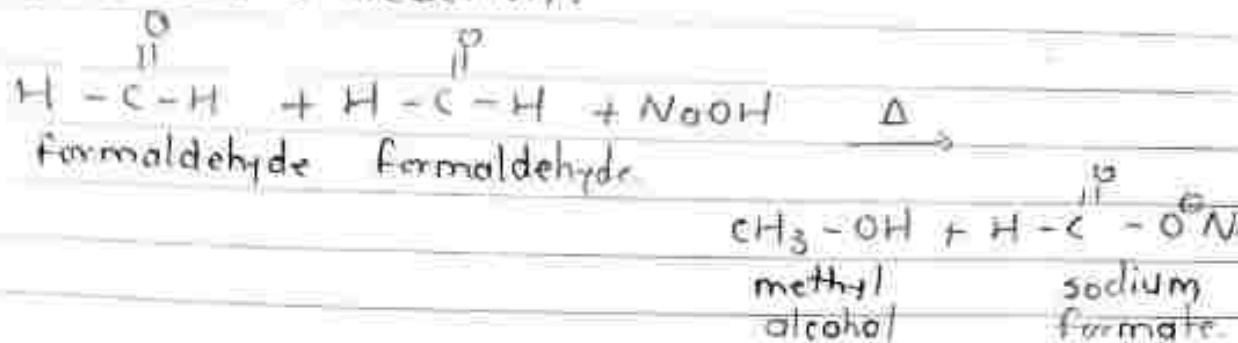

When any ketone react with hydrazin in the presence of sodium hydroxide and Heat, after removal of Nitrogen gas it gives respective alkane. It is also known as wolf kisher reaction or condensation.

Mechanism -

\* Cannizzaro Reaction:

When two molecules of formaldehyde react with each other in the presence of sodium hydroxide and heat then it gives alcohol (methyl alcohol) and sodium formate.

mechanism:-

Step I: separation of sodium hydroxide.

Sodium containing positive charge and hydroxy group containing negative charge (nucleophile)

Step II: nucleophile like hydroxy group react with first molecule of formaldehyde, nucleophile donates some electrons to the carbonyl carbon and carbon donates some electrons to oxygen to form hydroxy methanolate.

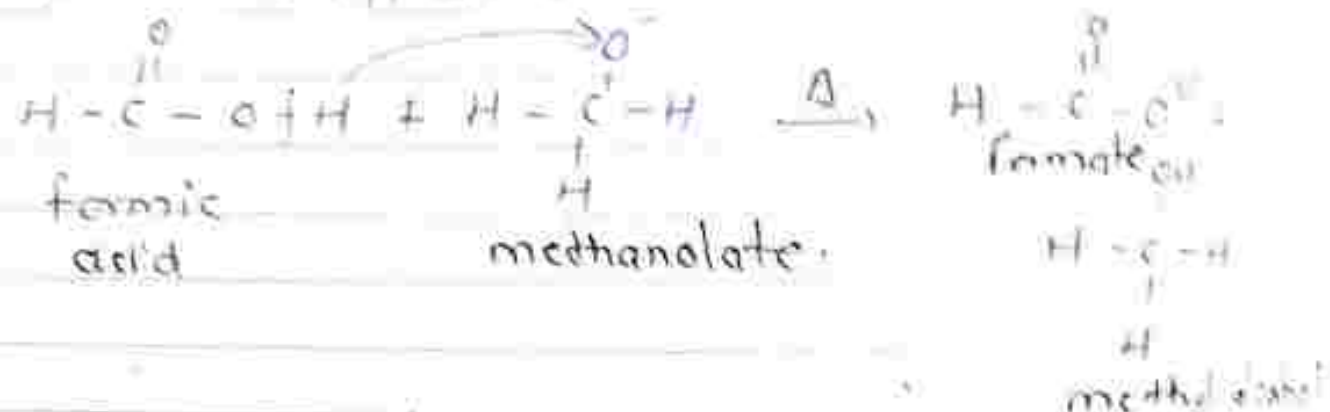

Step III:

hydroxy methanolate react with second molecule of formaldehyde to form formic acid and methanolate.

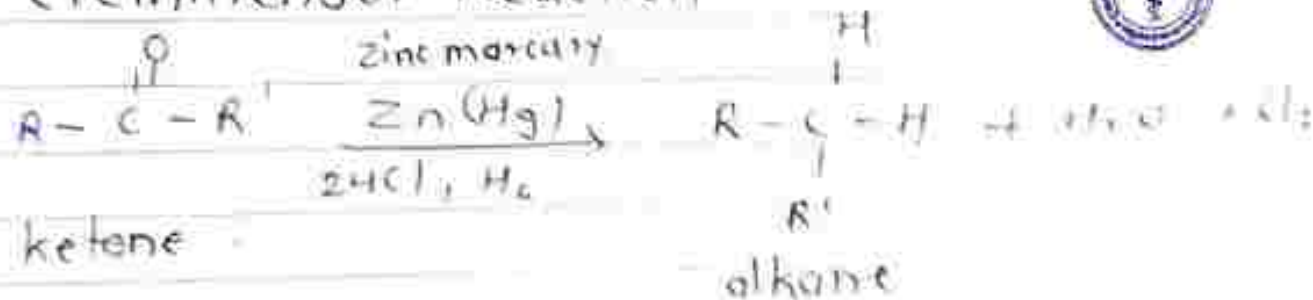

Step IV: Removal of one proton from formic acid and addition of one proton on methanol to form methyl alcohol.

Step V: formate react with methyl alcohol salt containing positive charge to form sodium formate.

## \* Clemmensen Reaction

It is conversion of ketone to alkane. When a ketone react with zinc (Hg) mercury complex and in the presence of 2 molecules of HCl and hydrogen gas then it gives respective alkane. This reaction is also known as Clemmensen reduction or clemmensen reaction.

mechanism:-

or structure,  
10r

↓ -H<sub>2</sub>O

✶ Hofmann Reaction:-

amide react with bromides and 4 molecule of sodium hydroxide to gives primary amine.

mechanism:-

step I: two molecule of sodium hydroxide react with each other bromine gas it give sodium hypobromide and sodium bromide, water.

Step II:

separation of sodium hypobromide if gives sodium containing positive charge and hypobromide containing bromine negative charge

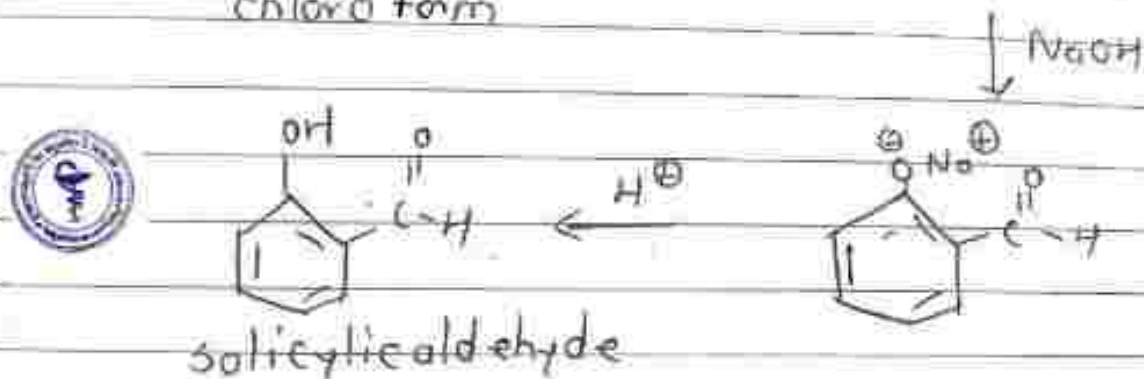

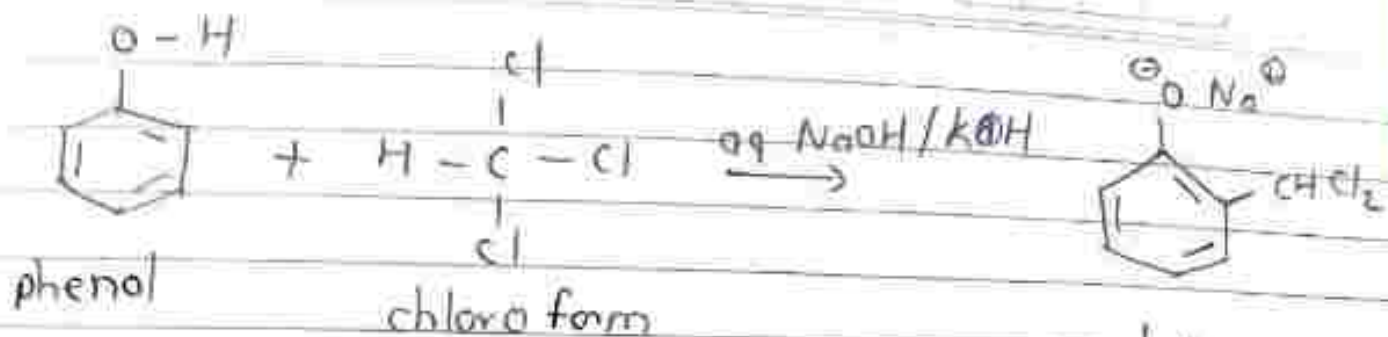

Step III:

Amide react with hypobromide to give primary amine.

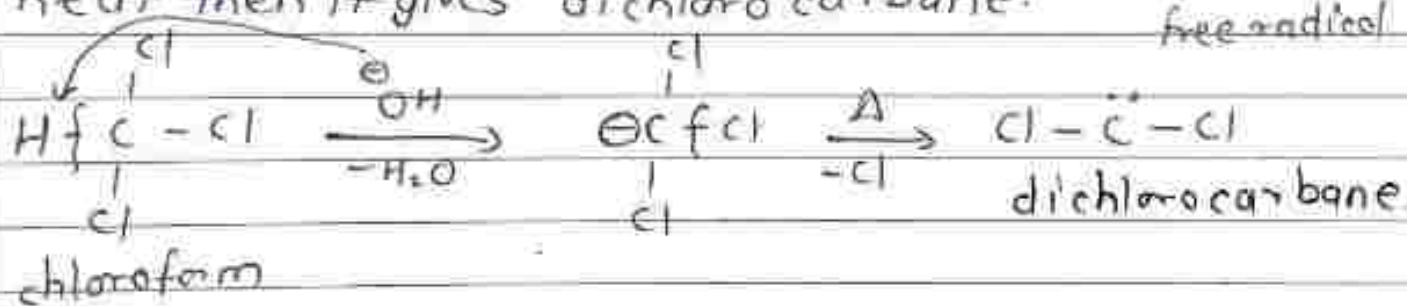

Reimer-Tiemann reaction:  
phenol react with chloroform in presence of any base sodium hydroxide / potassium hydroxide it gives salicylic aldehyde

Mechanism:-

Step I: chloroform react with nucleophile so it gives trichloro carbanion. This carbanion react with heat then it gives dichloro carbane.

Step II: phenol react with second molecule of potassium hydroxide and dichloro carbane so it gives salicylic aldehyde.
