THE DESIGN INNOVATION CENTRE (DIC)

Introduction : DIC- A link between SPPU Faculty, Spoke centers and Industry Partners

The SPPU faculties are actively working in the research area of chemical, physical, life sciences, social sciences, humanities and art. Because of the teaching and research contribution in the above areas, the university is recognized as the University with Potential of Excellence by the UGC. The SPPU conducts number of courses for post-graduate programme in the area of basic sciences, social sciences, humanities, arts and languages. In addition, the SPPU conducts under-graduate programme in Biotechnology and Bioinformatics. There are number of certificate and diploma courses that are being conducted for under graduate studies. The students are provided with well-established Library, Sports, Hostel, Counseling cell, Reading hall and Health Centre facilities. The expertise along with the spoke centers will be exploited to established prototype development generated out of the research programmes. This will establish a strong link between industries and end-users.

Thus, with the active participation of University faculty and Spoke centers, various innovative ideas will be envisioned and executed leading to the development of more number of prototypes for the sustenance and continuation of DIC activities.

Participation Status:

Design Innovation Centre (DIC) at SPPU has been established since 2015 as a DIC Hub Centre with 3 spoke centres at Vigyan Ashram (Pabal), at Ahmednagar and at Nashik Sanction of Rs. 10 Crore by MHRD-GOI under the scheme 'National Initiative for setting up of Design Innovation Centres, Open Design School & National Design Innovation Network.

DIC- SPPU Members:

- Prof. (Dr.) Jitendra K. Karmalkar (Hon. Vice Chancellor, SPPU)
- Prof. (Dr.) Arvind D. Sheligram (Co-ordinator, DIC- SPPU, Dean, Science & Technology, SPPU)
- Prof. (Dr.) Dilip D. Ghawale (Ex. Co-ordinator, DIC- SPPU)

Syllabus

(1) INNOVATIVE APPROACHES TO DRUG DESIGN

NSQF Level: 5

SECTOR: Life Sciences

ELIGIBILITY: Bachelor's degree in Chemical and Life Sciences, or B.Pharm.

FEES: Tuition Fees- Rs 3000/- (Rs 100/- per credit)-30 credits

Laboratory Fees- Rs 2000/- (Rs 2000/- per Semester)

Total Fees- Rs 5000/-

CERTIFICATE COURSE: 6 months (450 hours)

Credits: 30

KEY COMPETENCIES: The CADD Associate is responsible to propose and implement innovative chemo-informatics tools that are used by medicinal chemists and members of the CADD group to help with the design of optimized drug-like compounds. Data mining, analysis and predictive modelling for therapeutic project teams are also part of the job accountabilities

ASSESSMENT: Assessment include continuous assessments which will comprise of following:

- ✓ 20 marks of theory component
- ✓ 20 marks of internal assessments
- ✓ 60 marks of skill assessment conducted by assessors of SSC

Course Structure: The course can be run in any of the 2 semesters in a year.

Background

Currently, the drug discovery is facing severe innovation deficit. Number of new drugs approved has drastically reduced during last decades. Many drugs were withdrawn from market due to safety reasons. Clearly, present approaches to drug design need a fresh look. The 'lock and key' theory in which the drug key is acting on the single target lock was the basis of modern pharmacology. This led to the synthesis of one drug for one target for one disease. The major disadvantage of this approach was the side effects of drugs synthesized in that way. This guided the scientists to explore innovative approaches in drug design with multi targeted as well as multi compound drugs. This has led to a new branch in pharmaceutical science named as 'Network Pharmacology'. The Network pharmacology

COORDINATOR

utilizes the advancements in computational biology and systems biology to generate networks of interaction of drugs and their molecular targets.

Indian traditional system of medicine Ayurveda practices herbal formulations for thousands of years. But the exact mechanisms of action of these drugs are not explored much. In this scenario, the integration of drug discovery and bioinformatics with network pharmacology approach will give new perspective and larger acceptance to Ayurveda. These innovative approaches can also enrich modern pharmacology with new drug scaffolds, leads and methods for rational formulation design based on traditional knowledge systems like Ayurveda.

Objectives: The objectives of the course are –

- To make students learn the science and art of "Drug Designing"
- To make students learn to design and interpret the results of herbal formulations
- To have hands on experience with the advanced computational tools available for identifying drug-biomolecule interactions.
- To integrate diverse information into discovery knowledge by exploiting the advantages of integration of drug discovery and bioinformatics with network pharmacology approach

The course has been planned to have both theory and computational lab components. Theory modules of 150 hrs duration each will cover the lectures on Basics of Drug action mechanism, theories of drug-receptor interactions, introduction to fundamental concepts behind the molecular modeling software, structure activity relationship of drug & drug like molecules, molecular docking techniques and logic behind the Drug designing.

Structure: This course is designed for the students having Bachelor degree in any science streams like, biology, chemistry, biotechnology, microbiology, pharmacy, who aspire to make a career in the areas of Research and Development of pharmaceutical sciences with an aim to introduce them at an early stage to the modern concept of Drug Designing and the computational tools available. Students who have completed second year of Bachelor degree may be permitted to enroll as an 'add-on' course.

The course will also be suitable for entry level R&D scientists for training them to use computer based methods of research in Pharmaceutical and Agrochemical Industries.

Contents:

1. Introduction to pharmaceutical sciences
2. Introduction to Ayurveda and Herbal medicine
3. Introduction to safety pharmacology
4. Introduction to Drug Design, Discovery and Development
5. Current methods of drug design and their limitations
6. Computational biology and its applications in drug design
7. Network Pharmacology and its scope
8. Databases to identify bio actives of medicinal plants
9. Tools and software to identify known molecular targets
10. Tools and software to predict molecular targets
11. Tools and software to identify and predict diseases with molecular targets
12. Tools and software to generate networks
13. Tools and software to analyze the generated networks
14. Molecular docking studies
15. Exploring Network pharmacology to study Ayurveda
16. Network pharmacology to study Ayurvedic formulations
17. Innovative approach for multi targeted, multi compound formulation design
18. Seminar, Review and Analysis

Hands on Practical (300 hours)

Major equipment and facilities required:

1. Computer Lab with Networking
2. Multinode Cluster - parallel computing

F.No. 2-6/D-NSQF/PMKVY-TI-NSC/2016
28th August, 2018

Dear Sir/Madam,

This is with reference to your on-line application for participation in the National Skill endeavor through the Pradhan Mantri Kaushal Vikas Yojna for Technical Institutions (PMKVY-TI) for Academic Year 2018-19.

The National Steering Committee in its meeting held on 09/08/2018 under the Chairmanship of Secretary (HE), MHRD has approved the list of AICTE approved institutes / Polytechnics to give training to youth in technical skills of NSQF under PMKVY-TI. The list of approved institutes along with approved Sectors and Specializations is uploaded on AICTE website at <https://www.aicte-india.org/sites/default/files/Final-List%20of%20PMKVY-TI%202018-19.PDF>

The Council is pleased to inform that your institute/ Polytechnic has also been selected to offer training under PMKVY-TI for the Academic Year 2018-19. You are requested to mobilize students for the recommended sector and specialization to give training under the scheme. The AICTE portal for uploading student details will be live from 15th September, 2018. The duration of training should be as prescribed by respective Sector Skill Council. The detailed instructions for institutes to upload student details on AICTE portal under PMKVY-TI is attached for your ready reference.

The User Manual and Guidelines of the scheme is uploaded on AICTE Website at https://www.aicte-india.org/schemes/other-schemes/pmkvy/pmkvy_2018-19

Your attention is drawn to changes/additions as has been introduced in the scheme. This has been published vide Corrigendum 1 and is applicable from PMKVY-TI 2018-19. The same may be accessed at www.aicte-india.org. The changes pertain to mandatory recording of attendance, maximum time limit for a course and post training placement.

In case of any further clarification please send a mail to : pmkvy-ti@aicte-india.org or call at 011-25131577.

Wishing you good luck for your successful journey in this National mission of developing skilled manpower.

Warm Regards,

The Principal / Director

(Prof. M.P. Poonia)

Subject: Student Batches under PMKVY-TI for AY 2018-19 on AICTE Portal

To: priya.rao@pravara.in

Dear Sir/Madam

This is in reference to to the students data enrolled by your institute under the PMKVY-TI scheme on AICTE portal. It has been observed that your institute have filled the student's data on AICTE portal and successfully submitted the batches.

This is to inform that you can start the training as per their proposed "Batch Start Date" without waiting for any further confirmation from AICTE. The Council has already initiated the process of release of grant to your institute.

VALUE ADDED COURSE ON
"HANDS ON SOPHISTICATED INSTRUMENTS"
FOR PG STUDENTS
2018-19

COURSE NAME : HANDS ON SOPHISTICATED INSTRUMENTS

DURATION : 42 HOURS

Duration of the value added course and Time taken to gain the qualification may vary according to the pathway taken and will be kept very flexible to meet learning objectives with optimum utilization of existing infrastructure. The course has flexible delivery mechanism (weekends) to suit needs of students.

LEARNING OBJECTIVES :

1. To understand principles, instrumentation and applications of chromatographic, Spectroscopic, spray dryer and radio chemical techniques employed for the analysis of APIs and formulations.
2. To know validation of analytical instruments & methods as per ICH/USP guidelines.
3. To independently operate and calibrate various analytical instruments for the assay of various APIs and formulations as per Pharmacopoeial standards.

5. To independently validate UV-VIS Spectrophotometric assay method as per ICH guidelines.
6. To take appropriate safety measures while handling instruments, chemicals and apparatus.

METHODOLOGY OF TRAINING:

1. The training methods to be used should be appropriate to the development of competencies. The focus of the programme is on "performing" and not on "Knowing".
2. Lecturing will be restricted to the minimum necessary and emphasis to be given for learning through practical on-site training.
3. The training methods will be individual centered to make each person a competent one.
4. Opportunities for individual work will be provided.
5. The learning process will be continuously monitored and feedback will be provided on individual basis. Demonstrations using different models, audio visual aids and equipment will be used intensively.

CERTIFICATE

Students on successful completion of the course will be awarded competency-based certificates issued by Pravara Rural College of Pharmacy, Pravaranagar.

SYLLABUS

The following topics to be discussed with special reference to quality control and assurance of the pharmaceuticals, its scope and importance in the pharmaceutical industry along with suitable examples

Sr.	Practical competencies	Theory knowledge	Duration
1.	Handling and operation of HPLC. Calibration of HPLC Understanding different elution techniques. Understanding types of column used in HPLC	1.Theory, instrumentation and applications of HPLC . 2. Isocratic & Gradient types, Pumps, Columns, Detectors, Tubings, Degassing techniques, Quantitation techniques, 3. Trouble shooting in brief and System suitability testing, 4.. UPLC: Introduction and advantages over HPLC	6 Hrs
2.	Handling and operation of UV Spectrophotometer. Calibration of UV Spectrophotometer Understanding different UV techniques Single and Multicomponent analysis Methods	1. Theory, Beer lamberts law, its deviations and limitations, Woodward rule, concept of photometry and spectrophotometry. 2. Instrumentation-single beam and types of double beam UV – Spectrophotometer. 3.Optimum conditions for Spectrophotometric measurements, Single and Multicomponent analysis Methods. 4. Derivative Spectrophotometry, Spectrophotometric titration, Applications of UV-Visible spectrophotometry	6 Hrs
3.	Handling and operation of Flame Photometer. Calibration of Flame Photometer Analysis of different drug	Flame Photometry- Principle, Instrumentation and application	6 Hrs

	<p>Understanding basic principle of fluorimeter and different filter used in fluorimetry</p> <p>Handling and operation fluorimeter.</p> <p>Calibration of fluorimeter</p> <p>Analysis of different drug sample by fluorimeter.</p> <p>Precaution to be taken while handling fluorimeter</p>	<p>1. Excitation and emission spectra, Molecular luminescence, measurement of fluorescence,</p> <p>2. factors affecting fluorescence.</p> <p>3. Quantitative aspects of fluorescence, Instrumentation, Spectrofluorometry, advantages and disadvantages.</p> <p>4. applications, synchronous fluorescence</p>	
5.	<p>Infrared Spectroscopy</p> <p>Handling and operation of Infrared Spectroscopy.</p> <p>Sampling techniques for solid, liquid and gas samples</p> <p>Analysis and Interpretation of organic compounds.</p> <p>Precaution to be taken while handling Infrared Spectroscopy</p>	<p>1. Infrared Spectroscopy: Origin of IR spectra, Molecular vibrations, fundamental bands, Vibrational frequency, Fermi resonance,</p> <p>2. Important spectral regions.</p> <p>3. FTIR: Theory, Instrumentation, sample handling, different attachments used in recording FTIR</p> <p>4. Analysis and Interpretation of organic compounds based on FTIR Spectra</p>	6 Hrs
6.	<p>Spray dryer</p> <p>Handling and operation of Spray dryer</p> <p>Precaution to be taken while handling Spray dryer</p>	<p>Spray dryer</p> <p>1. Principle working and instrumentation of spray dryer .</p> <p>2. Types of atomizers like rotary disk and single-fluid high pressure swirl nozzles</p> <p>3. Types of spray dryer.</p> <p>4. About Institute

The institution is run by Pravara Rural Education Society, very popular for its commitment to upliftment of Rural mass through education. Pravara Rural Education Society was established in 1964 by Late Padmaresh Dr. Vitthalrao Vikhe Patil, the pioneer of Sagar Co-operative movement. Pravara Rural College of Pharmacy has its inception in 1987 when Bachelor of Pharmacy (B. Pharm) was started under University of Pune. The College offers post graduate courses (M. Pharm) in Pharmacognosy, Pharm Chemistry and Quality Assurance Techniques. The college has celebrated its silver jubilee year in 2013. It is one of the oldest pharmacy colleges in the University of Pune. Today it has marked its name in the world by continued research activities. It is imparting quality education in pharmacy to fulfill the need of Pharma industries and community.

About the course

The training provides opportunity to Students about Handling of Sophisticated Instruments which meets your industrial requirements and select instrument for a particular analysis with some idea of its merits, demerits and limitations.

Objectives:

1. Demand driven short term training courses based on Modular Employable Skills (MES) decided in consultation with industry and optimum utilization of existing infrastructure to make training effective.
2. Flexible delivery mechanism (weekends) to suit needs of various target groups and understand principles, instrumentation and applications of chromatographic, spectroscopic, spray dryer and radio chemical techniques employed for the analysis of APIs and formulations.
3. Independently operate and calibrate various analytical instruments for the assay of various APIs and formulations as per Pharmacopoeial standards.
4. Independently process, interpret the data obtained through experimentation and report the results as per regulatory requirements.

Course : Hands on Compression machine and tablet technology

Objectives :

On completion of laboratory experiments learner should be able to

- Explain tablets as a dosage form, types of granulation, physico-chemical principles guiding tablet formulation,
- Explain the various parts of compression machine
- this course provides the basics about formulations, how they work, and the roll of the excipients
- Identify the types of tooling, Defects in tableting & remedies thereof.
- hands-on session on how to set-up compression machine
- Operate the Compression machine to his/her own
- Clean a tablet machine to his/her own
- to solve common tablet defects
- The participant will see firsthand how different granulating processes can provide vastly different results.
- At the end of this course the participant will understand what is necessary to make, or improve a tablet making process and will receive a certificate of completion

Hands on Compression machine and tablet technology

Syllabus :

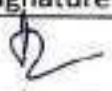

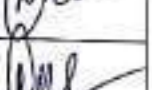

Sr. No	Topic	Prescribed hours
1	Study of tablet press and its parts and types of tooling	01
2	Study and learn to set-up compression machine	01
3	Study and learn to set-up compression machine	01
4	Study and learn to Operate the Compression machine-0 to adjust parameters-hardness, weight, dimensions etc.	03
5	Study and learn to Clean a tablet machine.	01
6	Preparation and evaluation of different types of granules and to study various defects	06
7	Preparation & evaluation of Tablets using non aqueous wet granulation and to study various defects	06
8	Preparation & evaluation using aqueous Wet granulation and to study various defects	02
9	Preparation & evaluation of effervescent tablets	03
10	To study effect of binders concentration on hardness & Disintegration of tablet	03
11	Effect of various additives on flow property of granules	02
12	Effect of lubricant concentration on flow properties of granule	02

About Institute:

The institution is run by Pravara Rural Education Society, very popular for its commitment to upliftment of rural mass through education. Pravara Rural Education Society was established in 1964 by Late Padmashri Dr. Vithalrao Vithhe Patil, the pioneer of Sugar Co-operative movement. Pravara Rural College of Pharmacy has its inception in 1987 when Bachelor of Pharmacy (B. Pharm) was started under University of Pune. The College offers post graduate courses (M. Pharm) in Pharmacognosy, Pharm Chemistry and Quality Assurance Techniques. The college has celebrated its silver jubilee year in 2011. It is one of the oldest pharmacy colleges in the University of Pune. Today it has marked its name in the world by continued research activities. It is imparting quality education in pharmacy to fulfil the need of Pharma industries and community.

About the course:

The Hands-on Course in Tablet Technology program that provides an extensive review of conventional and advanced manufacturing technologies, that is used to develop a variety of tablets and continuous manufacturing systems.

Objectives:

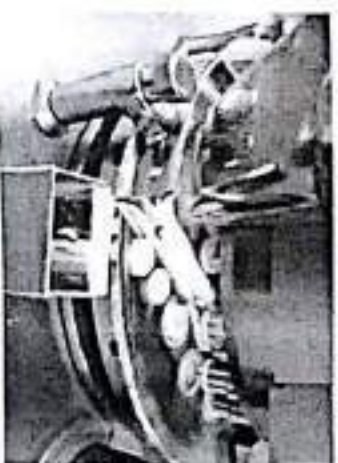

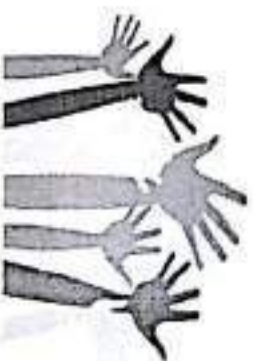

To provide a scientific overview of the entire tabletting operation and extensive hands-on experience with technology associated with developing and manufacturing tablets

Program duration: -

This course is organised for Third year B. Pharm students.

PRAVARA RURAL COLLEGE OF PHARMACY
CERTIFICATE COURSE ON
"HANDS ON SOPHISTICATED INSTRUMENTS"
2017-18

COURSE NAME : HANDS ON SOPHISTICATED INSTRUMENTS

DURATION : 42 HOURS

Duration of the Programme and Time taken to gain the qualification may vary according to the pathway taken and will be kept very flexible to meet learning objectives with optimum utilization of existing infrastructure. The course has flexible delivery mechanism (weekends) to suit needs of students.

LEARNING OBJECTIVES :

1. To understand principles, instrumentation and applications of chromatographic, Spectroscopic, spray dryer and radio chemical techniques employed for the analysis of APIs and formulations.
2. To know validation of analytical instruments & methods as per ICH/USP guidelines.
3. To independently operate and calibrate various analytical instruments for the assay of various APIs and formulations as per Pharmacopoeial standards.
4. To independently process, interpret the data obtained through experimentation and report the results as per regulatory requirements.
5. To independently validate UV-VIS Spectrophotometric assay method as per ICH guidelines.
6. To take appropriate safety measures while handling instruments, chemicals and apparatus.

METHODOLOGY OF TRAINING:

1. The training methods to be used should be appropriate to the development of competencies. The focus of the programme is on "performing" and not on "Knowing".
2. Lecturing will be restricted to the minimum necessary and emphasis to be given for learning through practical on-site training.
3. The training methods will be individual centered to make each person a competent one.
4. Opportunities for individual work will be provided.
5. The learning process will be continuously monitored and feedback will be provided on individual basis. Demonstrations using different models, audio visual aids and equipment will be used intensively.

CERTIFICATE

Students on successful completion of the course will be awarded competency-based certificates issued by **Pravara Rural College of Pharmacy, Pravaranagar.**

SYLLABUS

The following topics to be discussed with special reference to quality control and assurance of the pharmaceuticals, its scope and importance in the pharmaceutical industry along with suitable examples

Sr.	Practical competencies	Theory knowledge	Duration
1.	Handling and operation of HPLC. Calibration of HPLC Understanding different elution techniques. Understanding types of column used in HPLC	1.Theory, instrumentation and applications of HPLC . 2. Isocratic & Gradient types, Pumps, Columns, Detectors, Tubings, Degassing techniques, Quantitation techniques, 3. Trouble shooting in brief and System suitability testing, 4.. UPLC: Introduction and advantages over HPLC	6 Hrs
2.	Handling and operation of UV Spectrophotometer. Calibration of UV Spectrophotometer Understanding different UV techniques Single and Multicomponent analysis Methods	1. Theory, Beer lamberts law, its deviations and limitations, Woodward rule, concept of photometry and spectrophotometry. 2. Instrumentation-single beam and types of double beam UV – Spectrophotometer. 3.Optimum conditions for Spectrophotometric measurements, Single and Multicomponent analysis Methods. 4. Derivative Spectrophotometry, Spectrophotometric titration, Applications of UV-Visible spectrophotometry	6 Hrs
3.	Handling and operation of Flame Photometer. Calibration of Flame Photometer Analysis of different drug sample by Flame Photometer. Precaution to be taken while handling Flame Photometer	Flame Photometry- Principle, Instrumentation and application	6 Hrs
4.	Fluorimetry Understanding basic principle of fluorimeter and different filter used in fluorimetry Handling and operation fluorimeter.	Fluorimetry 1. Excitation and emission spectra, Molecular luminescence, measurement of fluorescence, 2.factors affecting fluorescence. 3. Quantitative aspects of fluorescence, Instrumentation, Spectrofluorometry, advantages and disadvantages.	6 Hrs

	Calibration of fluorimeter Analysis of different drug sample by fluorimeter. Precaution to be taken while handling fluorimeter	4. applications, synchronous fluorescence	
5.	Infrared Spectroscopy Handling and operation of Infrared Spectroscopy. Sampling techniques for solid, liquid and gas samples Analysis and Interpretation of organic compounds. Precaution to be taken while handling Infrared Spectroscopy	1. Infrared Spectroscopy: Origin of IR spectra, Molecular vibrations, fundamental bands, Vibrational frequency, Fermi resonance, 2. Important spectral regions. 3. FTIR: Theory, Instrumentation, sample handling, different attachments used in recording FTIR 4. Analysis and Interpretation of organic compounds based on FTIR Spectra	6 Hrs
6.	Spray dryer Handling and operation of Spray dryer Precaution to be taken while handling Spray dryer	Spray dryer 1. Principle working and instrumentation of spray dryer . 2. Types of atomizers like rotary disk and single-fluid high pressure swirl nozzles 3. Types of spray dryer. 4. Spray dryer used in formulation 5. Application of spray dryer	6 Hrs
7.	Stability Chamber Handling and operation of Stability chamber Precaution while handling	Stability testing 1. Principle, working and instrumentation of stability chamber 2. Stability testing guidelines 3. Critical parameters	6 Hrs

About the course:

The training provides opportunity to Students about Handling of Sophisticated Instruments which meets your industrial requirements and Select Instrument for a particular analysis with come idea of its merits, demerits and limitations.

Objectives:

1. Demand driven short term training courses based on Modular Employable Skills (MES) decided in consultation with Industry and optimum utilization of existing infrastructure to make training effective.
2. Flexible delivery mechanism (weekends) to suit needs of various target groups and understand principles, instrumentation and applications of chromatographic, Spectroscopic, spray dryer and radio chemical techniques employed for the analysis of APIs and formulations.
3. Independently operate and calibrate various analytical instruments for the assay of various APIs and formulations as per Pharmacopoeia standards.
4. Independently process, interpret the data obtained through experimentation and report the results as per regulatory requirements.

FREE SKILL DEVELOPMENT COURSES

PRAVARACARE is an initiative by PRES towards development of skill amongst the youth, simultaneously benefitting them financially, in consonance with the Central Govt. & State Govt. skill development schemes viz, PMKVY and PMKVUA. A very small proportion of India's workforce has any formal skill training. In this context, skill development has become a key primacy area for our country. This is not only essential for economic development, but would help to achieve youthful aspirations for better remuneration, better job satisfaction and promising self-employment opportunities. These courses will be conducted at all colleges of PRES & will be available free of cost to the students.

Minimum Eligibility	: Passed Class 7 & upto Graduate Level.
Age Limit	: 14 to 40 years
● Registration Fees	: Free of cost

FREE SKILL DEVELOPMENT COURSES

PRAVARACARE is an initiative by PRES towards development of skill amongst the youth, simultaneously benefitting them financially, in consonance with the Central Govt. & State Govt. skill development schemes viz, PMKVY and PMKVUA. A very small proportion of India's workforce has any formal skill training. In this context, skill development has become a key primacy area for our country. This is not only essential for economic development, but would help to achieve youthful aspirations for better remuneration, better job satisfaction and promising self-employment opportunities. These courses will be conducted at all colleges of PRES & will be available free of cost to the students.

Minimum Eligibility	: Passed Class 7 & upto Graduate Level.
Age Limit	: 14 to 40 years
Registration Fees	: Free of cost
Duration	: 2 to 3 Months
Job Guarantee	: 100%
Batch Size	: 20 to 30 Students

About Institute:

The institution is run by Pravara Rural Education Society, very popular for its commitment to upliftment of rural mass through education. Pravara Rural Education Society was established in 1964 by Late Padmashri Dr. Vithalrao Vikhe Patil, the pioneer of Sugar Co-operative movement. Pravara Rural College of Pharmacy has its inception in 1987 when Bachelor of Pharmacy (B. Pharm) was started under University of Pune. The College offers post graduate courses (M. Pharm) in Pharmacognosy, Pharm Chemistry and Quality Assurance Techniques. The college has celebrated its silver jubilee year in 2011. It is one of the oldest pharmacy colleges in the University of Pune. Today it has marked its name in the world by continued research activities. It is imparting quality education in pharmacy to fulfil the need of Pharma industries and community.

About the course:

The Hands-on Course in Tablet Technology program that provides an extensive review of conventional and advanced manufacturing technologies, that is used to develop a variety of tablets and continuous manufacturing systems.

Objectives:

To provide a scientific overview of the entire tableting operation and extensive hands-on experience with technology associated with developing and manufacturing tablets

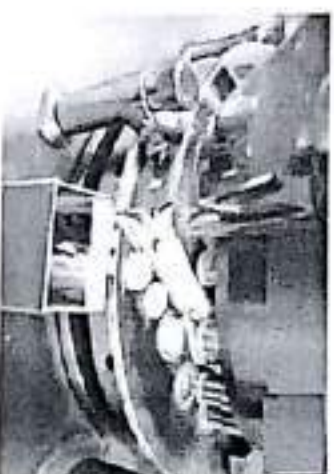

Program duration: -

This course is organised for Third year B. Pharm students.

Venue

Seminar Hall, Pravara Rural College of
Pharmacy, Pravaranagar

CERTIFICATE COURSE ON

"HANDS ON SOPHISTICATED INSTRUMENTS"

2016-17

COURSE NAME : HANDS ON SOPHISTICATED INSTRUMENTS

DURATION : 42 HOURS

Duration of the Programme and Time taken to gain the qualification may vary according to the pathway taken and will be kept very flexible to meet learning objectives with optimum utilization of existing infrastructure. The course has flexible delivery mechanism (weekends) to suit needs of students.

LEARNING OBJECTIVES :

7. To understand principles, instrumentation and applications of chromatographic, Spectroscopic, spray dryer and radio chemical techniques employed for the analysis of APIs and formulations.
8. To know validation of analytical instruments & methods as per ICH/USP guidelines.
9. To independently operate and calibrate various analytical instruments for the assay of various APIs and formulations as per Pharmacopoeial standards.
10. To independently process, interpret the data obtained through experimentation and report the results as per regulatory requirements.
11. To independently validate UV-VIS Spectrophotometric assay method as per ICH guidelines.
12. To take appropriate safety measures while handling instruments, chemicals and apparatus.

METHODOLOGY OF TRAINING:

6. The training methods to be used should be appropriate to the development of competencies. The focus of the programme is on "performing" and not on "Knowing".
7. Lecturing will be restricted to the minimum necessary and emphasis to be given for learning through practical on-site training.
8. The training methods will be individual centered to make each person a competent one.
9. Opportunities for individual work will be provided.
10. The learning process will be continuously monitored and feedback will be provided on individual basis. Demonstrations using different models, audio visual aids and equipment will be used intensively.

CERTIFICATE

Students on successful completion of the course will be awarded competency-based certificates issued by **Pravara Rural College of Pharmacy, Pravaranagar.**

SYLLABUS

The following topics to be discussed with special reference to quality control and assurance of the pharmaceuticals, its scope and importance in the pharmaceutical industry along with suitable examples

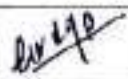

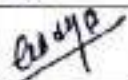

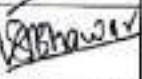

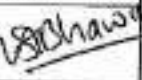

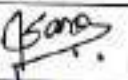

Sr.	Practical competencies	Theory knowledge	Duration
1.	Handling and operation of HPLC. Calibration of HPLC Understanding different elution techniques. Understanding types of column used in HPLC	1.Theory, instrumentation and applications of HPLC . 2. Isocratic & Gradient types, Pumps, Columns, Detectors, Tubings, Degassing techniques, Quantitation techniques, 3. Trouble shooting in brief and System suitability testing, 4.. UPLC: Introduction and advantages over HPLC	6 Hrs
2.	Handling and operation of UV Spectrophotometer. Calibration of UV Spectrophotometer Understanding different UV techniques Single and Multicomponent analysis Methods	1. Theory, Beer lamberts law, its deviations and limitations, Woodward rule, concept of photometry and spectrophotometry. 2. Instrumentation-single beam and types of double beam UV – Spectrophotometer. 3.Optimum conditions for Spectrophotometric measurements, Single and Multicomponent analysis Methods. 4. Derivative Spectrophotometry, Spectrophotometric titration, Applications of UV-Visible spectrophotometry	6 Hrs
3.	Handling and operation of Flame Photometer. Calibration of Flame Photometer Analysis of different drug sample by Flame Photometer. Precaution to be taken while handling Flame Photometer	Flame Photometry- Principle, Instrumentation and application	6 Hrs
4.	Fluorimetry Understanding basic principle of fluorimeter and different filter used in fluorimetry Handling and operation of fluorimeter.	Fluorimetry 1. Excitation and emission spectra, Molecular luminescence, measurement of fluorescence, 2.factors affecting fluorescence. 3. Quantitative aspects of fluorescence, Instrumentation, Spectrofluorometry, advantages and disadvantages.	6 Hrs

Course : Hands on Compression machine and tablet technology

Objectives :

On completion of laboratory experiments learner should be able to

- Explain tablets as a dosage form, types of granulation, physico-chemical principles guiding tablet formulation,
- Explain the various parts of compression machine
- this course provides the basics about formulations, how they work, and the roll of the excipients
- Identify the types of tooling, Defects in tableting & remedies thereof.
- hands-on session on how to set-up compression machine
- Operate the Compression machine to his/her own
- Clean a tablet machine to his/her own
- to solve common tablet defects
- The participant will see firsthand how different granulating processes can provide vastly different results.
- At the end of this course the participant will understand what is necessary to make, or improve a tablet making process and will receive a certificate of completion

Hands on Compression machine and tablet technology

Syllabus :

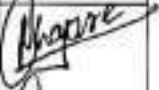

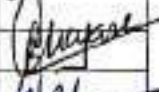

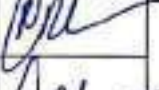

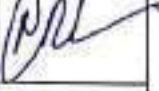

Sr. No	Topic	Prescribed hours
1	Study of tablet press and its parts and types of tooling	01
2	Study and learn to set-up compression machine	01
3	Study and learn to set-up compression machine	01
4	Study and learn to Operate the Compression machine-0 to adjust parameters-hardness, weight, dimensions etc.	03
5	Study and learn to Clean a tablet machine.	01
6	Preparation and evaluation of different types of granules and to study various defects	06
7	Preparation & evaluation of Tablets using non aqueous wet granulation and to study various defects	06
8	Preparation & evaluation using aqueous Wet granulation and to study various defects	02
9	Preparation & evaluation of effervescent tablets	03
10	To study effect of binders concentration on hardness & Disintegration of tablet	03
11	Effect of various additives on flow property of granules	02
12	Effect of lubricant concentration on flow properties of granule	02

About Institute:

The institution is run by Pravara Rural Education Society, very popular for its commitment to upliftment of rural mass through education. Pravara Rural Education Society was established in 1964 by Late Padmasri Dr. Vitthalnath Vikhe Patil, the pioneer of Sugar Co-operative movement. Pravara Rural College of Pharmacy has its inception in 1987 when Bachelor of Pharmacy (B. Pharm) was started under University of Pune. The College offers post graduate courses (M. Pharm) in Pharmacognosy, Pharm Chemistry and Quality Assurance Techniques. The college has celebrated its silver jubilee year in 2011. It is one of the oldest pharmacy colleges in the University of Pune. Today it has marked its name in the world by continued research activities. It is imparting quality education in pharmacy to fulfil the need of Pharma industries and community.

About the course:

The Hands-on Course in Tablet Technology program that provides an extensive review of conventional and advanced manufacturing technologies, that is used to develop a variety of tablets and continuous manufacturing systems.

Objectives:

To provide a scientific overview of the entire Tableting operation and extensive hands-on experience with technology associated with

Program duration: -

This course is organised for Third year B. Pharm students.

CERTIFICATE COURSE ON

"HANDS ON SOPHISTICATED INSTRUMENTS"

2015-16

COURSE NAME : HANDS ON SOPHISTICATED INSTRUMENTS

DURATION : 42 HOURS

Duration of the Programme and Time taken to gain the qualification may vary according to the pathway taken and will be kept very flexible to meet learning objectives with optimum utilization of existing infrastructure. The course has flexible delivery mechanism (weekends) to suit needs of students.

LEARNING OBJECTIVES :

13. To understand principles, instrumentation and applications of chromatographic, Spectroscopic, spray dryer and radio chemical techniques employed for the analysis of APIs and formulations.
14. To know validation of analytical instruments & methods as per ICH/USP guidelines.
15. To independently operate and calibrate various analytical instruments for the assay of various APIs and formulations as per Pharmacopoeial standards.
16. To independently process, interpret the data obtained through experimentation and report the results as per regulatory requirements.
17. To independently validate UV-VIS Spectrophotometric assay method as per ICH guidelines.
18. To take appropriate safety measures while handling instruments, chemicals and apparatus.

METHODOLOGY OF TRAINING:

11. The training methods to be used should be appropriate to the development of competencies. The focus of the programme is on "performing" and not on "Knowing".
12. Lecturing will be restricted to the minimum necessary and emphasis to be given for learning through practical on-site training.
13. The training methods will be individual centered to make each person a competent one.
14. Opportunities for individual work will be provided.
15. The learning process will be continuously monitored and feedback will be provided on individual basis. Demonstrations using different models, audio visual aids and equipment will be used intensively.

CERTIFICATE

Students on successful completion of the course will be awarded competency-based certificates issued by **Pravara Rural College of Pharmacy, Pravaranagar.**

SYLLABUS

The following topics to be discussed with special reference to quality control and assurance of the pharmaceuticals, its scope and importance in the pharmaceutical industry along with suitable examples

Sr.	Practical competencies	Theory knowledge	Duration
1.	Handling and operation of HPLC. Calibration of HPLC Understanding different elution techniques. Understanding types of column used in HPLC	1.Theory, instrumentation and applications of HPLC . 2. Isocratic & Gradient types, Pumps, Columns, Detectors, Tubings, Degassing techniques, Quantitation techniques, 3. Trouble shooting in brief and System suitability testing, 4.. UPLC: Introduction and advantages over HPLC	6 Hrs
2.	Handling and operation of UV Spectrophotometer. Calibration of UV Spectrophotometer Understanding different UV techniques Single and Multicomponent analysis Methods	1. Theory, Beer lamberts law, its deviations and limitations, Woodward rule, concept of photometry and spectrophotometry. 2. Instrumentation-single beam and types of double beam UV – Spectrophotometer. 3.Optimum conditions for Spectrophotometric measurements, Single and Multicomponent analysis Methods. 4. Derivative Spectrophotometry, Spectrophotometric titration, Applications of UV-Visible spectrophotometry	6 Hrs
3.	Handling and operation of Flame Photometer. Calibration of Flame Photometer Analysis of different drug sample by Flame Photometer. Precaution to be taken while handling Flame Photometer	Flame Photometry- Principle, Instrumentation and application	6 Hrs
4.	Fluorimetry Understanding basic principle of fluorimeter and different filter used in fluorimetry Handling and operation fluorimeter.	Fluorimetry 1. Excitation and emission spectra, Molecular luminescence, measurement of fluorescence, 2.factors affecting fluorescence. 3. Quantitative aspects of fluorescence, Instrumentation, Spectrofluorometry, advantages and disadvantages.	6 Hrs

	Calibration of fluorimeter Analysis of different drug sample by fluorimeter. Precaution to be taken while handling fluorimeter	4. applications, synchronous fluorescence	
5.	Infrared Spectroscopy Handling and operation of Infrared Spectroscopy. Sampling techniques for solid, liquid and gas samples Analysis and Interpretation of organic compounds. Precaution to be taken while handling Infrared Spectroscopy	1. Infrared Spectroscopy: Origin of IR spectra, Molecular vibrations, fundamental bands, Vibrational frequency, Fermi resonance, 2. Important spectral regions. 3. FTIR: Theory, Instrumentation, sample handling, different attachments used in recording FTIR 4. Analysis and Interpretation of organic compounds based on FTIR Spectra	6 Hrs
6.	Spray dryer Handling and operation of Spray dryer Precaution to be taken while handling Spray dryer	Spray dryer 1. Principle working and instrumentation of spray dryer . 2. Types of atomizers like rotary disk and single-fluid high pressure swirl nozzles 3. Types of spray dryer. 4. Spray dryer used in formulation 5. Application of spray dryer	6 Hrs
7.	Stability Chamber Handling and operation of Stability chamber Precaution while handling	Stability testing 1. Principle, working and instrumentation of stability chamber 2. Stability testing guidelines 3. Critical parameters	6 Hrs

About Institute:

The institution is run by Pravara Rural Education Society, very popular for its commitment to upliftment of Rural men through education. Pravara Rural Education Society was established in 1964 by Late Padmanab Dr. Vitthalrao Yashwantrao Patil, the pioneer of Sugar Co-operative movement. Pravara Rural College of Pharmacy has its inception in 1987 when Bachelor of Pharmacy (B. Pharm) was started under University of Pune. The College offers post graduate courses (M. Pharm) in Pharmacopoeia, Pharm Chemistry and Quality Assurance Techniques. The college has celebrated its silver jubilee year in 2011. It is one of the oldest pharmacy colleges in the University of Pune. Today it has marked its name in the world by continued research activities. It is imparting quality education in pharmacy to fulfil the need of Pharma industries and community.

About the course:

The training provides opportunity to Students about Handling of Sophisticated Instruments which meets your industrial requirements and Select Instruments for a particular analysis with some idea of its merits, demerits and limitations.

Objectives:

1. Demand driven short term training courses based on Modular Employable Skills (MES) decided in consultation with Industry and optimum utilization of existing infrastructure to make training effective.
2. Flexible delivery mechanism (weekends) to suit needs of various target groups and understand principles, instrumentation and applications of - chromatographic, Spectroscopic, spray dryer and radio chemical techniques employed for the analysis of APIs and formulations.
3. Independently operate and calibrate various analytical instruments for the assay of various APIs and formulations as per Pharmacopoeias standards.
4. Independently process, interpret the data obtained through experimentation and report the results as per regulatory requirements.
