"We started with a handful of students under a thatched shed called Pravara Public School in 1964. But our story dates back to 1950 when the Pravara Cooperative Sugar Factory enabled prosperity for hitherto debt-ridden farmers. Pravara Rural Education Society took things to the next level by utilizing education for nation building, women empowerment, and integrated rural development. Today, our 42 thousand plus students and over 1 lakh alumni continue to carry forward our values to the world as we create synergy between the global and the local."

11.2.1. Sessional Exams

Two sessional exams shall be conducted for each theory / practical course as per the schedule fixed by the college(s). The scheme of question paper for theory and practical sessional examinations is given in the table. The average marks of two sessional exams shall be computed for internal assessment as per the requirements given in tables.

12. Promotion and award of grades

A student shall be declared PASS and eligible for getting grade in a course of M.Pharm.programme if he/she secures at least 50% marks in that particular course including internal assessment.

13. Carry forward of marks

In case a student fails to secure the minimum 50% in any Theory or Practical course as specified in 12, then he/she shall reappear for the end semester examination of that course. However his/her marks of the Internal Assessment shall be carried forward and he shall be entitled for grade obtained by him/her on passing.

14. Improvement of internal assessment

A student shall have the opportunity to improve his/her performance only once in the sessional exam component of the internal assessment. The re-conduct of the sessional exam shall be completed before the commencement of next end semester theory examinations.

15. Reexamination of end semester examinations

Reexamination of end semester examination shall be conducted as per the schedule given in table 29. The exact dates of examinations shall be notified from time to time.

Table – 29: Tentative schedule of end semester examinations

Semester	For Regular Candidates	For Failed Candidates
I and III	November / December	May / June
II and IV	May / June	November / December

16. Allowed to keep terms (ATKT):

No student shall be admitted to any examination unless he/she fulfills the norms given in 6. ATKT rules are applicable as follows:

A student shall be eligible to carry forward all the courses of I and II semesters till the III semester examinations. However, he/she shall not be eligible to attend the courses of IV semester until all the courses of I, II and III semesters are successfully completed.

A student shall be eligible to get his/her CGPA upon successful completion of the courses of I to IV semesters within the stipulated time period as per the norms.

Note: Grade AB should be considered as failed and treated as one head for deciding ATKT. Such rules are also applicable for those students who fail to register for examination(s) of any course in any semester.

17. Grading of performances

17.1. Letter grades and grade points allocations:

Based on the performances, each student shall be awarded a final letter grade at the end of the semester for each course. The letter grades and their corresponding grade points are given in Table – 30.

**Table – 30: Letter grades and grade points equivalent to
Percentage of marks and performances**

Percentage of Marks Obtained	Letter Grade	Grade Point	Performance
90.00 – 100	O	10	Outstanding
80.00 – 89.99	A	9	Excellent
70.00 – 79.99	B	8	Good
60.00 – 69.99	C	7	Fair
50.00 – 59.99	D	6	Average
Less than 50	F	0	Fail
Absent	AB	0	Fail

A learner who remains absent for any end semester examination shall be assigned a letter grade of AB and a corresponding grade point of zero. He/she should reappear for the said evaluation/examination in due course.

18. The Semester grade point average (SGPA)

The performance of a student in a semester is indicated by a number called 'Semester Grade Point Average' (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses by the student during the semester. For example, if a student takes five courses (Theory/Practical) in a semester with credits C₁, C₂, C₃ and C₄ and the student's grade points in these courses are G₁, G₂, G₃ and G₄, respectively, and then students' SGPA is equal to:

$$\text{SGPA} = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4G_4}{C_1 + C_2 + C_3 + C_4}$$

The SGPA is calculated to two decimal points. It should be noted that, the SGPA for any semester shall take into consideration the F and ABS grade awarded in that semester. For example if a learner has a F or ABS grade in course 4, the SGPA shall then be computed as:

$$\text{SGPA} = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4 * \text{ZERO}}{C_1 + C_2 + C_3 + C_4}$$

19. Cumulative Grade Point Average (CGPA)

The CGPA is calculated with the SGPA of all the IV semesters to two decimal points and is indicated in final grade report card/final transcript showing the grades of all IV semesters and their courses. The CGPA shall reflect the failed status in case of F grade(s), till the course(s) is/are passed. When the course(s) is/are passed by obtaining a [] subsequent examination(s) the CGPA

② Assignment :-

Page No.

Date 30 5 2023

Define Bond and write types of Bonds.

• Bond :-

Defⁿ: It is defined as the force of attraction between two or more atoms, ions that gives rise to formation of molecules or chemical compound.

→ Also known as chemical Bonding.

• Types of Bond / Bonding :-

(1) Ionic Bond :

- Also called as electrovalent Bond

- The Bond which is made by complete transfer of electrons are Ionic Bond valence

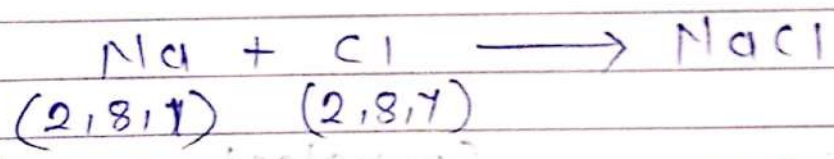

→ In this type of Bond Metal and non-metal combines together and form ionic Bond.

- Metals have low melting point & low ionization energy. So they always lose electrons.

Whereas Non-metals have high ionization energy. So, they always gain the electrons.

- The compounds form due to Ionic Bond called Ionic Compound.

eg: NaCl

- Here Na, gives one electron to chlorine to fulfill its stability to complete its octet.

- This type of Bond is ionic Bond.

Imp
(2) Covalent Bond :- Mutual sharing

- Covalent Bond is the type of Bond which includes the mutual sharing of electrons between two or more atoms.

- It is formed between two or more non-metals.

- Bond is formed between unpaired electrons.

e.g - (1) H₂O

Lewis Dot structure of hydrogen = H[•]
And of oxygen = $\cdot\ddot{O}\cdot$

(2) O₂

Lewis Dot structure of O = $\cdot\ddot{O}\cdot$

- Atomic number of oxygen is 8, its valency is 6.

• It requires two electrons to complete its octet or E.C.

- So, it gain 2 electrons from other oxygen molecule.

- And there is formation of Covalent Bond.

* There are two types of Covalent Bond :-

(1) Sigma Bond :- (σ)

- Sigma Bond are the strongest covalent bonds, owing to the direct overlapping of the participating orbitals.

- The electrons participating in a σ Bond are commonly referred as σ electrons.

• Conditions of σ Bond :-

- (1) s-s overlapping
- (2) s-p_x overlapping
- (3) p-p overlapping

(1) S - s overlapping :-

- This overlapping undergoes head-on overlapping along the inter-nuclear axis.

- This type of overlapping occurs in H_2 molecule, where each hydrogen atom has a half-filled orbital.

(2) S - p_x overlapping :-

- In this overlapping, one half-filled s-orbital overlaps with one half-filled p-orbital along internuclear axis.

- This type of overlapping observed in Ammonia (NH_3).

(3) P-P overlapping :-

- In this condition, one half-filled p orbital from each participating atom undergoes head on overlapping along the internuclear axis.

- This is an example of this overlapping.

- In sigma Bond head to head overlapping occurs.

(2) Pi Bond :- (π)

- The Bond is formed by parallel or side to side overlapping of p-orbitals.
