WHAT IS CLINICAL DATA MANAGEMENT

The process of collecting and managing research data in accordance with regulatory standards to obtain quality information that is complete and error-free

It involves all the aspects of processing the clinical data, working with a range of computer applications, database systems to support collection, cleaning and management of subject data.

The field of clinical data management (CDM) has come about due to demands from both the pharmaceutical industry and the regulatory authorities

Resume vs. CV

Many people use resume and CV interchangeably — but they are not the same.

The CV presents a full history of your academic credentials, in the length of the document. In contrast, a resume presents a concise picture of your skills and qualifications for a specific position. In length, resumes are shorter and do not exceed 30 years of experience (generally 2-3 pages).
